

VERON

DE HAVILLAND

Tiger Moth

18" SPAN.
DESIGNED BY PHIL SMITH.

DIAG 1.

first stage of construction - make two identical sides over plan side view.

pattern for cellophane windshield - make 2.

template of cowli either side of nose make 2 from post card.

incise longerons here, bend & fill with cement then add gussets for strength - also similar in front of F.6 at nose.

bind tail skid wire to stern bay with thread.

chamfer K.2's when joining sides.
